EDUCATION

University of Illinois Urbana-Champaign

Aug. 2025 – May 2028

B.S. Computer Science + Statistics (GPA: 3.67/4.0)

Urbana/Champaign, IL

Relevant coursework: Data Structures (C++), Computer Architecture (C), Statistics (R), Linear Algebra (Python), Database Systems (SQL), Algorithms and Models of Computation

EXPERIENCE

Research Assistant - MARTIANS Lab (Syed Bahauddin Alam, PhD)

May 2026 – Present

University of Illinois Urbana-Champaign · Dept. of Nuclear, Plasma & Radiological Engineering

Urbana, IL

- Build DeepONets and Fourier Neural Operators in PyTorch to predict reactor temperature fields from 75K samples
- Build an autoregressive inference pipeline forecasting 100 time steps from a single initial condition, achieving 3.9% relative L_2 validation error with a 2.4M-parameter 2D Fourier Neural Operator
- Design 10-step sliding-window training scheme, cutting 100-step rollout error 83% vs. single-step training

Course Assistant - CS128 Honors (Rust)

Jan. 2026 – Present

University of Illinois Urbana-Champaign

Urbana/Champaign, IL

- Hold weekly office hours for 40+ students on Rust ownership, borrowing, and multithreading
- Maintain course website, featuring up-to-date information on course policies and instructional videos

Certified Trainer

Mar. 2023 – Jul. 2026

Potbelly Sandwich Shop

Champaign, IL & Northbrook, IL

- Trained 15+ new employees on food safety and store operations across two locations
- Handled transactions and customer service and expedited and prepared orders during rush hours

PROJECTS

IlliniChat | Rust, TypeScript, React, SQLite, Tauri

Oct. 2025 – Dec. 2025

- Built a secure, RSA-encrypted, server-based chat app with data storage in SQLite
- Bridged a React/TypeScript frontend to the Rust core via Tauri; shipped macOS, Windows, and Linux builds
- Co-led a 3-person team using Git feature branches and PR review

Fantasy Premier League Assistant | Python, Jupyter Notebooks, Pandas, Scikit-Learn

Sep. 2025 – Dec. 2025

- Built a squad optimizer selecting the highest-projected lineup under FPL's budget, position, and club constraints
- Served predictions through a FastAPI backend to a React/TypeScript/TailwindCSS frontend
- Benchmarked XGBoost, Random Forest, Lasso, and linear regression on historical player data in pandas

Dronetrix | C#, Unity, Blender, Git

Jan. 2025 – Sep. 2025

- Created a VR game using Unity, GitHub, Visual Studio, C#, and Blender in a team of 3
- Created game objects and environments, scripted their behaviors, modeled and textured them in Blender
- Co-developed a neural-network-based movement algorithm for game objects

TECHNICAL SKILLS

Programming Languages: Java, Python, Rust, C#, C, C++, JavaScript, TypeScript, HTML, CSS, R, SQL

Tools: React, Node.js, Git, Unity, Blender, Tauri, Vite, Jupyter Notebooks, SQLite, Docker

Libraries: pandas, NumPy, PyTorch, Matplotlib, Scikit-Learn, TailwindCSS, FastAPI

Languages: English (Native), Russian (Native), Spanish (Proficient)

LEADERSHIP AND EXTRACURRICULARS

Delta Kappa Epsilon Fraternity | Brother

May 2026 – Present

Reflections|Projections | Full-Stack Software Engineer

Feb. 2026 – Present

- Develop and maintain various software systems for the Midwest's largest student-run tech conference
- Engineered a new Magic-Links based login system to increase security and ease of use for conference attendees

ACM SigAIDA (Special Interest Group for AI and Data Analytics) | Project Lead

Aug. 2025 – May 2026

- Lead semester-long group projects implementing AI and ML
- Participate in weekly Machine Learning and AI code puzzles in Python
